PROFESSIONAL RESUME

DevOps Engineer with over 10 years in the tech industry, expert in **cloud infrastructure**, **automation**, **AI**, and **DevOps** practices, along with **Nvidia** hardware for **MLOPS**.

Expert in **AWS**, **Azure**, **Kubernetes**, **Slurm (HPC)**, and Infrastructure as Code tools (**IaC**), with a strong focus on enhancing **security** and **compliance** through **CI/CD** pipelines and automation.

Passionate about **continuous learning** and contributing to the tech community through YouTube tutorials and **open-source** projects like **Netmaker** and **Soperator**

Staff DevOps Engineer at **Paradise Mobile** | Aug 2023 - Today

- Reduced **60% costs** by recreating the EKS architecture
- Enhanced **security** in the **network** - VPC | Transit Gateway | VPN | Load Balancing
- Configure On-Premise using Ansible - **VMware** | VMs | **Kubernetes**
- Boosted deployment speed with Infra as Code at the company - **Terraform**
- Increased reliability with **GitOps** using **ArgoCD**
- Architected Kubernetes with **Helm Charts**
- Reduced silos of communication between Dev and Ops team, bringing **DevOps** culture
- Responsible for **incident management**
- Developing in **NodeJS**, **React Native**, and **Typescript**
- Increasing response time with **Observability** strategies (**SLI SLO**)
- Responsible for Observability Stack - **Prometheus** | **Grafana** | **Open Telemetry** | **Fluent-Bit**

DevOps Engineer at **Rabobank** | Mar 2022 - Aug 2023

- Architected, Implemented, and documented a **Disaster Recovery Strategy**: Ensured data security and **reliability**, enhancing organizational **resilience**.
- **Post-mortem** documentation: Enabled learning from past incidents, improving operational processes and systems.
- **ComplianceOps** > Policies Applied by IaC and CI/CD: Streamlined **governance** and ensured consistent, automated compliance.
- **SecOps** > **Sonarqube** - **Fortify** - Security Applied with **IaC** and **CI/CD**: Bolstered security infrastructure, defending against cyber threats.
- Facilitated agile, scalable, and efficient infrastructure management by creating new architecture using IaC (**Terraform and Bicep**).
- Enhanced visibility and control over software deployments using **CI/CD** Techniques.
- Enhanced Security with **automation** and **CI/CD** Techniques (**Python** scripts)
- **Azure DevOps**: Boosted team productivity and ensured seamless, high-quality software releases.

DevOps Engineer at **Accenture** | Aug 2020 - Mar 2022

- Increased security with **VPN** application implementation in **Kubernetes**
- Deployed and configured the **ELK** stack
- Used **Splunk** to create Infrastructure based Alerts
- Programming in **Python** for **automation**
- System **Reliability** - **SLI SLO SLA** Error budgets
- Securing pipelines with best practices for **CI/CD** - **GitLab**, **Jenkins**
- Infrastructure managed with **Terraform** - **Azure** and **AWS**

Software Engineer at TRF 5th Region | Dec 2018 - Jul 2020

My role was not only to develop but also to make sure the ideas the company hired to do the Pje were making the best efforts to build secure, reliable, and user-friendly software that counselors could use.

- Maintained the quality of PJe's software - Brazilian Juridical Electronical Process
- Selenium
- Python

Support Engineer at Lenovo | Jan 2016 - Dec 2018

- Responsible to enhance capabilities of Lenovo test automation tool with Python
- QA
 - Automation tasks Linux and Python
 - Smoke test

EDUCATION

PUC Minas

MBA, Management Information Systems | jul 2019 - dec 2020

Federal University of Pernambuco

Bachelor's degree, Computer Engineering | Jan 2013 - Jul 2019

CERTIFICATES

AWS

AZURE

CKA

DATADOG

SPLUNK

PERSONAL PROJECTS

- [YouTube Courses](#) - Docker | Kubernetes | Terraform
- Contribution to open-source:
 - Contribution to the Soperator exporter from Nebius
 - [Created standalone Slurm Exporter](#)
 - This addition made it possible to run Nebius Slurm Exporter in any CSP, not only on the Nebius cloud.
 - [Add Slurm native secret rotation to Soperator](#)
 - [Contribution to Open-Source Project Netmaker Helm-Chart](#)
 - Added annotations for the ingresses for **external-dns** support (Rest and UI)
- Added **Kustomization** to WireGuard Service, allowing usage of network load-balancer (**NLB**) for **Ingress**
- [Personal website](#)
 - [Its GitHub](#)
- [Tutorials and articles](#)

TOP SKILLS

AWS, Azure, Kubernetes, Docker, ArgoCD, CI/CD, Terraform (IaC), GitHub Actions, Azure DevOps, Post-mortem, SLA/SLO/SLI, NGINX, Kafka, Grafana, Linux, DevOps, Terragrunt, Python, Typescript, Shell Script, Datadog, Prometheus, Monitoring, Splunk, Bicep, Helm Chart, Slurm, Alloy, Observability, Troubleshooting, HPC, Nvidia Hardware
